

Garmin Oregon 750 Handheld GPS/GLONNAS

EMAIL THIS PAGE

3" Handheld GPS with 8MP Camera

A Rugged and waterproof design allows the Garmin Oregon 750 to be used right out of the box. Take it on any outdoor adventure and it's able to withstand Mother Nature's elements while providing you with location information that's accurate within approximately 9 feet. A 3" sunlight viewable, dual oriented touchscreen will display the preloaded worldwide basemap with shaded relief. The built-in altimeter provides elevation data to accurately monitor ascent and descent, and can be used to predict weather changes by showing short-term trends in air pressure right in the palm of your hand.

Garmin redesigned the internal components of the Oregon 750 and built it with a new internal antenna that offers better performance and reception under heavy tree cover or in any situation where you may not have a clear view of the sky. A built in SD card slot offers expandability in storage space or to add on additional mapping for driving, off road use, or marine use. Whichever mapping you decide works best for you, start navigating with the ability to mark up to 10,000 waypoints and 250 routes with the included 4GB of internal memory. Your trackback feature will allow you to navigate back to your starting point, taking you back on the same path you originally traveled. Along the way on your travels, you can take photos with the built in 8mp digital camera and save them to your Oregon 750 or attach them to certain waypoints to bring them up at a later date.

Each 750 Oregon is built with LiveTrack which will share location and geocaching data wirelessly with other compatible Garmin devices. No need to worry about losing touch with the outside world while exploring, Garmin Smart Notifications via Bluetooth allow you to receive emails, texts, and alerts directly on your Oregon 750. A rechargeable NiMH battery is included but will also accept 2 AA's if you need a backup. A few hidden extras you will come to appreciate are the benefits of utilizing Basecamp Garmin's free trip planning software that lets you create trips, maintain waypoints, tracks and routes and also view and organize maps. The Oregon 750 handheld GPS is the perfect companion for your next outdoor adventure.

Key Features

Geocaching Live

The wireless Wi-Fi link and Bluetooth links on your Oregon 700 makes it easier than ever to enjoy a superior geocaching experience. You can set your device to automatically stay up to date with all the latest caches from Geocaching website.

Active Weather

Whether you're hiking, hunting, climbing, kayaking, trail riding or whatever, this rugged navigator is ready for anything. It features multilink wireless connectivity (Wi-Fi, Bluetooth and ANT+), Active Weather support with animated radar overlays and a 1-year BirdsEye Satellite Imagery subscription.

ABC Sensors

The Oregon 750 handheld provides comprehensive navigation and tracking to guide you on and off the beaten path, using GPS and GLONASS plus ABC (altimeter, barometer and compass) sensor capabilities.

8 MP Camera

Capture locations and memories with the 8 megapixel digital camera. Each photo is automatically geotagged, allowing you to easily navigate back to that exact spot in the future.
